

SENTRY PRINT SERVICES

Secure your office printing | Reduce costs and waste | Reduce IT infrastructure

Secure pull printing without the hassle of managing print servers, queues and drivers

- Secure your printing workflows to protect information and reduce waste
- Eliminate print servers, drivers and queues
- Works with all printers
- Fast, easy setup and deployment across locations
- Solution components update automatically
- Add the convenience of print release using a mobile device
- Add Beacon Analytics to help you continually optimize your environment and identify money-saving opportunities

The Secure dashboard provides quick access to key metrics.

CHALLENGES

FORGOTTEN AND ABANDONED PRINTS INTRODUCE RISK AND THEY WASTE TIME, SUPPLIES, AND MONEY.

Office printing environments present many security risks. Documents are often left in printer trays where anyone can pick them up, and recycle bins are routinely filled with sensitive information. These documents create compliance issues, security risks, and significant unnecessary costs in terms of paper, ink and toner. It might as well be dollar bills piling up in those blue bins.

MANAGING PRINT SERVERS AND DRIVERS CAN BE DIFFICULT AND TIME CONSUMING.

Companies continue to look for ways to reduce their IT infrastructure, and print as a service is another phase in this growing trend. Plus, corporate print environments can be complex, with devices from several manufacturers distributed across various locations. This complexity adds to the upfront costs and project timelines when deploying an on-site secure pull printing solution.

SOLUTIONS

In an environment secured by Sentry Print Services, employees can use their proximity card, their mobile device, or their login credentials to release and print their documents at any printer on the network. This user-friendly secure printing workflow significantly reduces waste and costs while ensuring document confidentiality. Any unprinted jobs left in the queue will automatically expire after a defined period of time.

With Sentry Print Services from Pharos, you can simplify your print environment and quickly deploy secure pull printing across your entire organization, with no print servers and drivers to configure and manage.

SETUP IS FAST AND EASY:

1. Install Print Scout on workstations (PC and Mac)
2. Employees complete a simple click-through setup on their workstation.
3. (Optional) Recommend that employees install the Sentry Print app on their mobile devices (if you wish to enable mobile release capability).
4. On the Beacon admin screen, your site administrator checks a box to automatically secure your network printers.

START USING SENTRY PRINT SERVICES:

Print jobs are held on the user's workstation and in the cloud (if enabled)¹

Employees walk up to their preferred or most convenient printer

Employees authenticate² at their chosen device and release their prints.

Choose the Print Solution that Best Fits Your Company's Needs and Environment

	SENTRY PRINT SERVICES - MOBILE	SENTRY PRINT SERVICES
SUMMARY	Provides the fastest path to secure pull printing, at the lowest cost. Popular in small business and branch offices.	Provides secure authentication with several workflow options.
PRINT JOB STORAGE	Jobs are held on individual workstations (on-premises) and in the cloud, if enabled.	Jobs are held on individual workstations and in the cloud, if enabled. ¹ Cloud storage ensures that the document can be printed even if the workstation goes offline or into sleep mode.
AUTHENTICATION METHOD	QR code (employees use the Sentry Print app on their mobile device to scan the QR code on a printer).	² All authentication methods are included: Mobile (QR), Proximity card, AD/LDAP credentials, and username/PIN.

This solution runs on the Pharos Beacon platform. Add Beacon Analytics and you'll have a complete print management solution that provides the clarity and insight you need to continually optimize your print environment and keep your costs down year after year.
