Get an Instant Price Quote for MediusGo

Every customer has Accounts Payable (AP), even the SMB. Still, by the time you go through discovery, integration discussions, and pricing, it has either slowed down the deal or become too expensive for the customer. MediusGo offers a SaaS-based AP processing solution with fixed installation costs that is affordable and easy to quote.

You need to ask three simple questions:

1. How many invoices per year?
2. What ERP are you using?
3. Are you capturing line item detail?

Objectif Lune Maintenance

PlanetPress Suite, and PrintShop Mail Suite are scheduled to officially move into "Maintenance Mode" status on January 1st, 2022.

To ensure the high level of support that customers expect from Objectif Lune, they work hard to provide timely patches and fixes to issues that arise for all the current product line-up. As better, more evolved technologies and innovations come to market, they adjust their focus to embrace products that are more ready for the future. They then review their product line-up and begin to transition "current" products towards "maintenance mode" and eventually to "end-of-life" status. This announcement impacts the following products:

Product	Maintenance Mode Data	Alternative
PlanetPress Suite (v7)	January 1st, 2022	PlanetPress Connect is the recommended alternative. Please contact your reseller or OL sales representative to discuss your specific needs.
PrintShop Mail Suite (v7)	January 1st, 2022	PrintShop Mail Connect OR PlanetPress Connect if automation is desired.

So, while they are not at the "end-of-life" status for these products, and no date has been set for that, Cranel strongly advises you to confirm that your customers are aware of the situation, so that they can consider a move to the Connect platform.
