Canon

Production Scanners from Canon

Canon Production Scanners

Canon production scanners combine advanced technology, reliable performance, and comprehensive features to meet the demanding needs of businesses that require high-quality and efficient scanning solutions.

Image Quality

- Employ advanced image processing technologies and high-resolution sensors to capture details accurately and deliver clear and crisp scans.

Speed and Efficiency

- Designed to handle high volume scanning tasks efficiently and offer fast scanning speeds and advanced feeding mechanisms to ensure smooth and uninterrupted scanning workflows.

Reliability and Durability

- Built to withstand heavy daily use and engineered with robust components to ensure long-lasting performance – these are the scanners for demanding production environments.

Advanced Features and Software

- Includes features such as: automatic document size detection, double-feed detection, image enhancement tools, and customizable scanning profiles.

Kodak Alaris New connections for smarter work

KODAK Infuse Smart Connected Scanning Solution
Cloud-connected, scanning directly into business systems

Fast, bi-directional data capture at the front edge of the business process. Customers can onboard data directly into their line of business systems and validate each transaction in real time.

- Does not require a connected PC, which significantly improves the security of the data capture process
- Automatically identifies missing or incorrect data via end-user notifications, preventing re-work downstream
- No user training required: scan one simple setup sheet to get started
- System on a chip technology delivers superior integration flexibility and power efficiency

Kodak alaris Departmental Document Scanners

KODAK Departmental Document Scanners
A powerful, connected solution that meets your needs as you grow

By digitizing critical information from documents of various types, data becomes accessible and sharable immediately, enabling faster and more informed decisions and improving overall business efficiency. KODAK departmental document scanners are designed to be shared by multiple users in departments that need to capture large batches of documents.

- **Built-in image processing:** Our document scanners don't rely on the CPU power of a connected workstation or PC, which frees up the PC for use on other tasks
- **Network sharing:** Secure access by any PC on your network, without having to relocate laptops or cables or purchase additional equipment
- **Perfect Page technology:** Automatically convert documents of poor quality into crisp, clear, high-quality digital images while scanning at full-rated speeds. Our scanners output smaller file sizes than our competitors, which minimizes storage costs and speeds up data retrieval
- **Smart Touch** software is included, making it easy to distribute data wherever it's needed with the simple push of a button

SOFTWARE

KOFAX

Balancing Traditional & Cloud Services in a Remote-Work World

Traditional print infrastructure is often a mishmash of devices, printer drivers, and software solutions all sourced from different providers. And in a remote-work environment, these patchwork solutions need to be extended even further to support a distributed workforce. Click below to learn how cloud printing could be the solution that your customers need.
