**Kodak alaris**

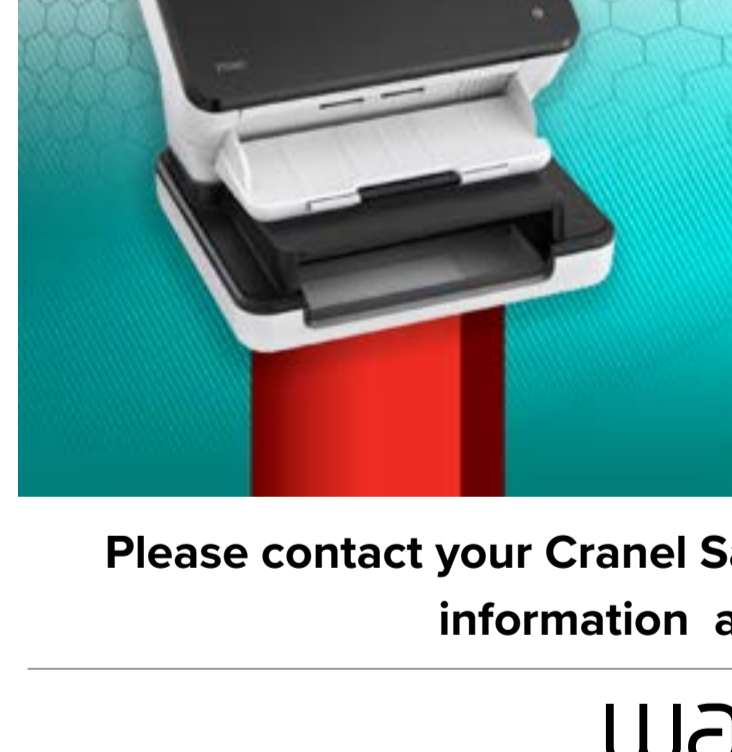

Keypoint Intelligence has presented Kodak Alaris with the Buyers Lab (BLI) 2023 Scanner Line of the Year Award. This is the seventh time in eight years that Kodak Alaris has earned this coveted accolade. Each year, the award recognizes the product line deemed best overall, based on rigorous lab evaluations of several vendors.

"When it comes to document scanning, Kodak Alaris is king," said Lee Davis, Senior Analyst in Keypoint Intelligence's Office Group. "Our testing revealed that scanners from Kodak Alaris provide superior media handling, image quality, OCR accuracy, file compression, and workflow automation capabilities compared to the competition."

**Wacom®**  
for Business

**Electro-Magnetic Resonance (EMR) Technology**

**Why EMR?**

- EMR delivers a digital handwriting experience that feels as intuitive and natural as pen on paper
- The beauty of EMR is that power can pass through LCD displays and protective surfaces without the need for any external power sources
- This means there are no batteries to wear out, or power cables to twist and break

**How does it work?**

- Wacom's patented EMR technology consists of a layer of sensor that sits behind the device's Liquid Crystal Display (LCD) screen and a layer of hardened glass
- The sensors are arranged in an alternating vertical/horizontal grid pattern
- Each sensor is precisely calibrated and emits a weak electromagnetic signal
- Together, these signals create a magnetic field that extends about 5mm beyond the glass surface of the device
